

### Consumer Show COVID Protocols

Welcome back to live! **Cottage Life** and **Seasons Christmas Show** fans are excited to return, and we're thrilled to have a plan in place to welcome them back safely this season. We are going above and beyond government guidelines and are implementing the following measures to ensure a safe experience at the show for all.

- 1. Proof of Vaccination Required-** Following the Province of Ontario's announcement it will implement a mandatory vaccination policy for indoor public events effective September 22, the Fall Cottage Life Show and Seasons Christmas Show will require all attendees, exhibitors, sponsors, staff, and service providers to provide proof of vaccination to enter the facility. (Children under 12 years of age and those with a verified medical exemption will be exempted from these requirements.)
- 2. COVID-19 Mandatory Health Screening & Contact Tracing** - All attendees, exhibitors, sponsors, staff, and service providers will be asked to complete a COVID-19 screening questionnaire before entering the premises, and provide contact information for contact tracing (this will occur each day they are on the premises).
- 3. Mask or Face Covering Required** - It is mandatory that everyone ages 2+ wear a mask or face covering inside The International Centre at all times (subject to certain specific exceptions).
- 4. Timed-Entry Tickets** - We are implementing timed-entry tickets in order to space out crowds and provide a safe and enjoyable experience, while adhering to the current government guidelines as they relate to building capacities.
- 5. Enhanced Cleaning and Disinfecting Procedures** -We are increasing our cleaning schedule and will be disinfecting high-touch and high-traffic areas multiple times a day.
- 6. In addition to the measures the Cottage Life and Seasons Christmas Shows are putting in place**, all of the International Center's staff, cleaners, concessions personnel, and subcontractors will also be required to be fully vaccinated during our upcoming events. Please find the International Center's COVID-19 safety plan for visitors and attendees [here](#).
